## METHODOLOGY

- ❑ Crimes perpetrated within the borders of South Africa reported at the 1 161 police stations including satellite stations and stations at ports of entry are discussed in this report. Reported crimes are recorded as they are brought (by either the victims, witnesses or third parties) to the attention of the police or as when detected by the police, irrespective of when the crime(s) were committed.
  
- ❑ The crime statistics are derived from the administrative recording process where a crime code is allocated to each reported crime type (e.g. murder). Crime codes are then aggregated into daily summary of serious crime (DSSC) codes.
  
- ❑ Each station has to synchronise its aggregated codes to allow the province and national to synchronise for computation and dissemination, monthly, quarterly and annually.
  
- ❑ The crime report mainly focuses on the 21 priority crimes grouped into two main types namely
  - 17 community-reported serious crimes (subdivided into four broad categories, contact, contact-related, property-related and other serious crimes) and
  - the crimes detected as a result of police action.

## METHODOLOGY

- ❑ To properly measure and explain the changing crime trend direction, the count difference between the years including the percentage increase and decrease is computed.
- ❑ The percentage changes are computed by comparing the preceding and current (period under review) financial year figures. The following formula is used:

$$\text{Percentage Change (\% Increase/Decrease)} = \frac{\text{Current Figure} - \text{Past Figure}}{\text{Past Figure}} \times 100$$

- If the previous year's figure is 0, only the actual figure for the current financial year is mentioned.
- ❑ The crime to population ratio is computed for provincial comparability in the number of crimes committed against persons during a specific financial year.
  - The mid-year population estimates to make the computation of the ratios is obtained from Statistics South Africa (Stats SA) and is based on the 2021 series. The following formula is used:

$$\text{Population Ratio} = \frac{\text{Current Figure}}{\text{Population Figure}} \times 100\,000$$

## COUNTING RULES

- ❑ The statistics represent the number of charges or counts and not the number of case dockets registered.
  - One case docket can contain a single count of a specific offence, multiple counts of same offence or several different type of offences.
  - The recorded offences may involve one victim or complainant or multiple victims.
  - e.g. if murder and rape occurred during a house robbery incident, all three crimes will be counted in the statistics.
  - In murders bodies are counted, while for rape victims and perpetrators are counted for a charger to be registered (e.g. if four people die in one incident, then for murder charges are recorded and if three perpetrators raped one woman then three counts of rapes will be registered. Inversely if three women are raped by one perpetrator then also three rapes will be registered. Also if three women are raped each by three men then nine counts of rapes will be registered).

## COUNTING RULES...

- ❑ For property crimes , regardless of how many items are taken only one count will be registered , e.g. if a TV , radio and microwave are stolen in one incident of burglary at residential premises then only one count will be registered.
- ❑ Different crime definitions and classifications are used by different agencies or institutions. The SAPS definition of robbery of cash in transit (CIT), for instance, differs with the definition used by the Cash In Transit Association of South African (CITASA). According to the SAPS definition, the CIT Company must already have taken control over the money, while with CITASA the CIT Company must be present when the money is robbed and not necessarily having taken control of the money

## DISSEMINATION

- ❑ The SAPS crime statistics dissemination processes adheres to principles and standards that inter alia endorses transparency . SAPS crime statistics dissemination processes subscribes to :
  - the United Nation (UN) Fundamental principles of Official Statistics,
  - the International Monetary Fund (IMF) General Data Dissemination Standard (GDDS) and
  - the South African Statistical Quality Assessment Framework (SASQAF).
  
- ❑ According to SASQAF indicators and standards as informed by the UN's Official Statistics principles, statistical release must be made available to all users at the same time and must be released on a pre-announced schedule.
  - The pre-announced schedule (calendar) for the quarters of the 2023/2024 financial year is published on the SAPS website ([www.saps.gov.za](http://www.saps.gov.za)), taking into account the GDDS requirements about the release of non-economic statistics six weeks after the reference period.
  - Definitions of crime are also available in this presentation

# CRIME DETECTED AS A RESULT OF POLICE ACTION

---

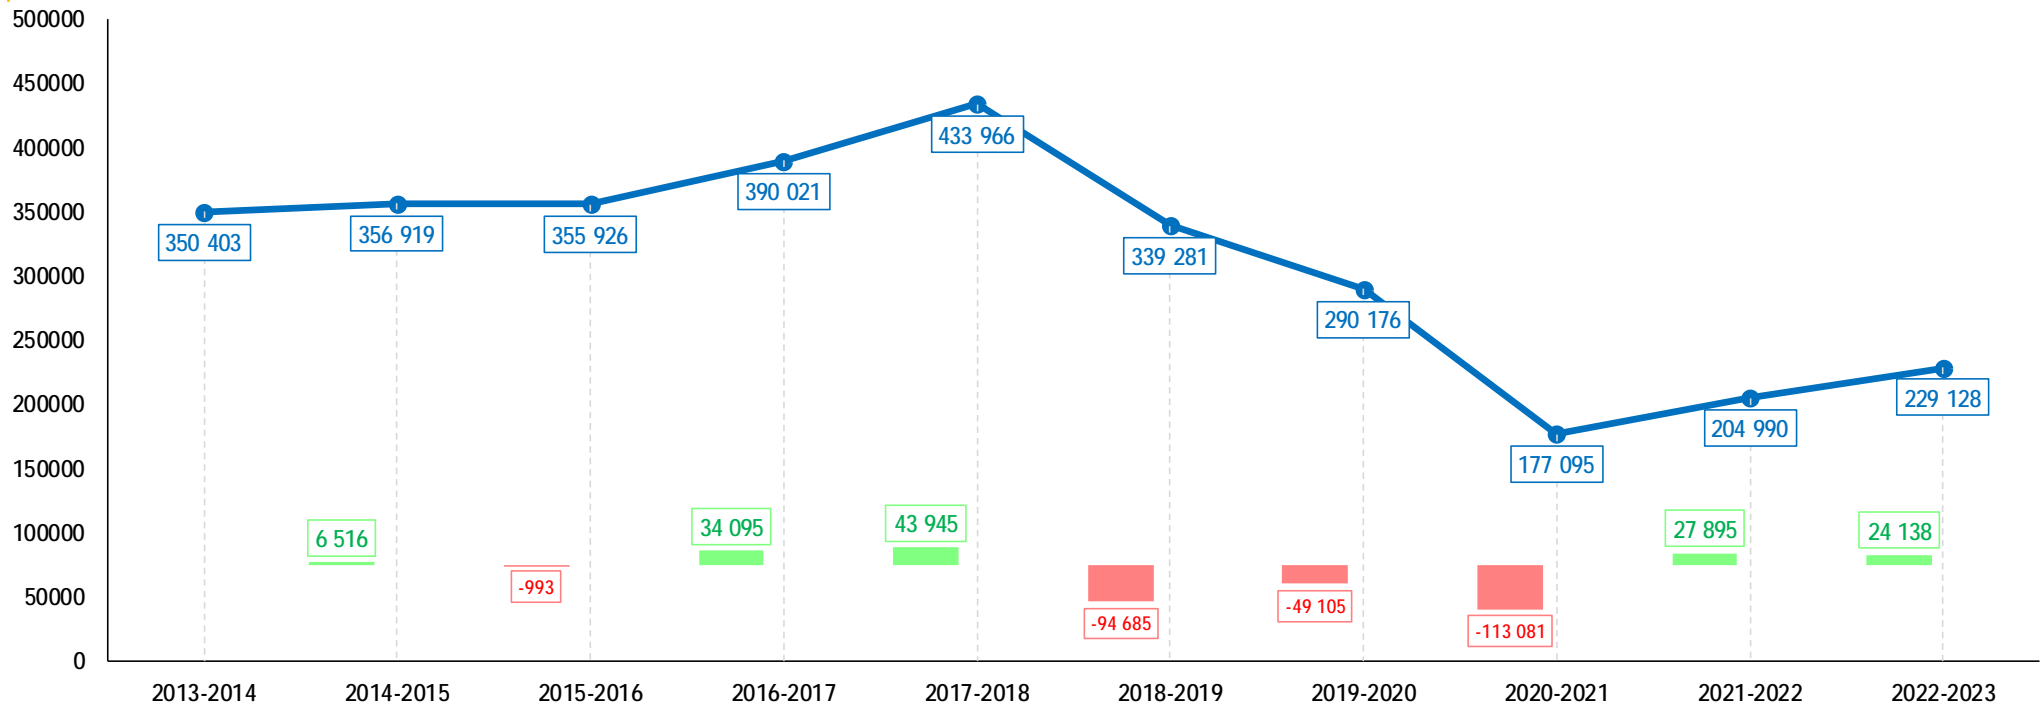

Crime detected as a result of police action is usually not reported to the police, largely dependent on the deployment of law enforcement personnel and employment of intelligence. The crime is usually recorded after the apprehension of suspects in connection with following offences:

- Illegal possession of firearms and ammunition,
- Drug-related crimes,
- Driving under the influence of alcohol and/or drugs, and
- Sexual offences detected as a result of police action.
